BEAUTY ANGEL

The BEAUTY ANGEL RVT 30 is a skin and body therapy booth. It uses a combination of red light therapy and the patented Vibra Shape platform to deliver a powerful combination of results.

Connective tissue cells are stimulated by 30 high-performance Beauty Light lamps to produce collagen, elastin and hyaluron quite naturally. Small wrinkles are reduced and the skin becomes visibly tighter and smoother. Improved cell production also increases the muscles' ability to regenerate. The results of photo bio stimulation (stimulation of the body using light) are complemented by the fitness training given by the vibration plate.

Thanks to Vibra Shape the BEAUTY ANGEL offers not just an innovative light treatment, but also a healthy training effect. The patented seesawing function simulates normal walking, which means the patented vibration plate is a 100% physiological training method. It trains all of the muscles from the legs up into the abdomen and back. At the same time weight loss is encouraged by increased calorie consumption, and cellulite can be prevented thanks to the tightening of the connective tissue. The improved circulation also has a positive effect on the photo-rejuvenation results.
